Children's Mental Health Plan – Development Process Timeline

WORKGROUP OVERVIEW

- **Social Determinants of Health** – recommendations will focus on the social, economic, and physical conditions where children and their families live, learn, work, and play and their unique impact on mental health and well-being.
- **Promotion and Prevention** - recommendations will focus on maximizing mental health and wellness for all children and their families prior to the emergence of a mental, behavioral, or developmental disorder while also minimizing mental health challenges for high-risk populations.
- **Early Intervention** – recommendations will focus on addressing mental health concerns as early in life as possible when early signs or symptoms have emerged, including how to best target those children and families at greatest risk for significant mental, behavioral, or developmental disorders.
- **Treatment** – recommendations will focus on addressing the needs of children with mental, behavioral, or developmental disorders and their families with targeted interventions to address identified mental health concerns in the least restrictive setting.
